## Update Frequency:

Weekly

## One Page Narrative:

This data set contains the most recent inspection information for approximately 800 food facilities permitted in the City of Berkeley. These include restaurants, bars, grocery stores, markets and any facility that dispenses food to the public. This information includes name and address of the food facility, identification of any major or minor violations, and date of last inspection. Data is updated once a week.

**Major** violations are those that pose an immediate risk to public health and warrant immediate closure of the food establishment or immediate correction.

**Minor** violations are those that do not pose an immediate risk to public health, but warrants correction.

Types of violations are:

- Improper Holding Temperature
- Inadequate Cooking
- Personal Hygiene
- Contaminated Equipment
- Unsafe Food Source

## Tabular Data Descriptions

| Column Name   | API Field Name                               | Comment                                       |
|---|--|---|
| <b>W3ALCD</b>                                       | W3ALCD                                       | Inspection ID                                 |
